

## Keeping your residents safe, healthy and in their retirement community

Nurse On Board is an organization dedicated to bringing the services of talented, highly experienced Registered Nurses into the community and Retirement Residences. This fosters exemplary care of residents while giving peace of mind to family members and support staff. Our RN Care Managers are accustomed to addressing complex issues, resulting in reduced ER visit and hospitalizations, promoting the best possible outcome through assessment and care in the comfort of home.

To become an RN Care Manager, each nurse must have a minimum of 15 years of nursing experience and a solid understanding of the hospital environment and community care. All nurses benefit from a team of nurse specialists to call upon, and many have over 30 years of experience themselves. All RN's are in good standing with the College of Nurses of Ontario and are well-suited to this unique role.

### Three Options For Care Management

Nurse On Board offers easy-to-use packages to extend RN Care Management to both independent and assisted living residences. These customizable options are designed to provide expert guidance to the Director of Care and/or nursing staff in the form of phone support as well as in-person visits when needed. Simply select the number of hours and timing you prefer to meet your distinct needs.
